

Kendeo Gosti
kengosti@gmail.com | (510) 378-5759 | Union City, CA

EDUCATION

University of California San Diego — La Jolla, CA

Class of 2030 | GPA: IP

James Logan High School — Union City, CA

Class of 2026 | GPA: 4.0

SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, HTML, Tailwind CSS,

Frameworks & Libraries: React, Flask, OpenCV, NumPy, Pandas, PyTorch

Tools & Databases: Git/GitHub, VS Code, SQLite, Excel, Claude

Artificial Intelligence: Generative AI, Prompt Engineering, AI-Assisted Development, Workflow Automation, Machine Learning, LLM APIs

Mathematics: Multivariable Calculus, Differential Equations, Linear Algebra, Statistics

Additional Skills: Analytical Problem Solving, Organization, Adaptability, Time Management, Leadership

WORK EXPERIENCE

Software Developer — Freelance

2025–Present

- Built lightweight Python and automation tools for individuals and community members
- Created custom keyboard macros and workflow automations for 10+ users based on individual needs
- Developed Flask-based tools and scripts for data management, repetitive tasks, and workflow automation

Technology & Operations Assistant — Family Catering Business

2023–Present

- Developed internal tools for order tracking, scheduling, and customer records across 30+ customers
- Automated repetitive spreadsheet and administrative workflows using Python and Excel
- Supported scheduling, order coordination, and day-to-day business operations

Hollister, Abercrombie & Fitch — *Team Member*

2025–Present

- Aided customers with product selection, sizing, and general questions
- Maintained organized merchandise displays, fitting rooms, and sales floors
- Collaborated with team members to provide efficient and friendly customer service

James Logan Mentoring Program — *Student Mentor*

2024–2026

- Mentored high school students in math and computer science
- Volunteered 200+ hours supporting academic growth and confidence-building
- Developed communication and leadership through consistent weekly meetings

Speech & Debate Team (Forensics) — *Varsity Member*

2023–2024

- Competed across the Bay Area in public speaking and performance events
- Honed skills in memorization, stage presence, and audience engagement

PROJECTS

Real-Time Computer Vision Automation System — *Python, OpenCV, Computer Vision*

- Created a real-time computer vision system to detect visual events and trigger automated inputs
- Applied OpenCV image detection and region-based tracking to improve detection accuracy and timing
- Integrated configurable hotkeys and keyboard macros for low-latency automated responses

Attendance Management System — *Python, Flask, Excel*

- Developed a web-based attendance system for managing and recording participant check-ins
- Implemented user management, duplicate-entry prevention, date filtering, and attendance tracking
- Built separate administrative and general-user functionality with persistent database storage

Small Business Order Management Platform — *Python, Flask, SQLite*

- Built a dashboard for managing customer orders, payments, pickup dates, and order status across 30+ customers
- Implemented customer search, order filtering, automated totals, duplicate detection, and CSV/Excel export

Wardrobe & Outfit Tracker — *React, JavaScript*

- Constructed an interactive wardrobe application for organizing clothing and tracking daily outfits
- Developed inventory management, photo uploads, outfit selection, and calendar-based outfit history
- Designed a customizable interface with clothing categories and outfit “equipment” slots
